Effective FEMA Floodplains

- Zone X (Shaded)
- Zone AE
- Zone D
- Zone X (Unshaded)

FEMA Floodplain Definitions:

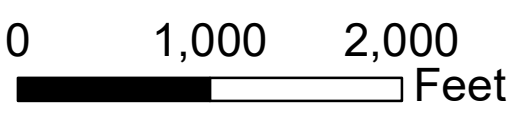

Zone X (Unshaded) - Minimal risk areas outside the 1 percent (100-year) and 0.2 percent (500-year) annual-chance floodplains.

Zone X (Shaded) - Moderate risk areas within the 0.2-percent (500-year) to 1-percent (100-year) annual-chance flooding. Average depths are less than 1-foot.

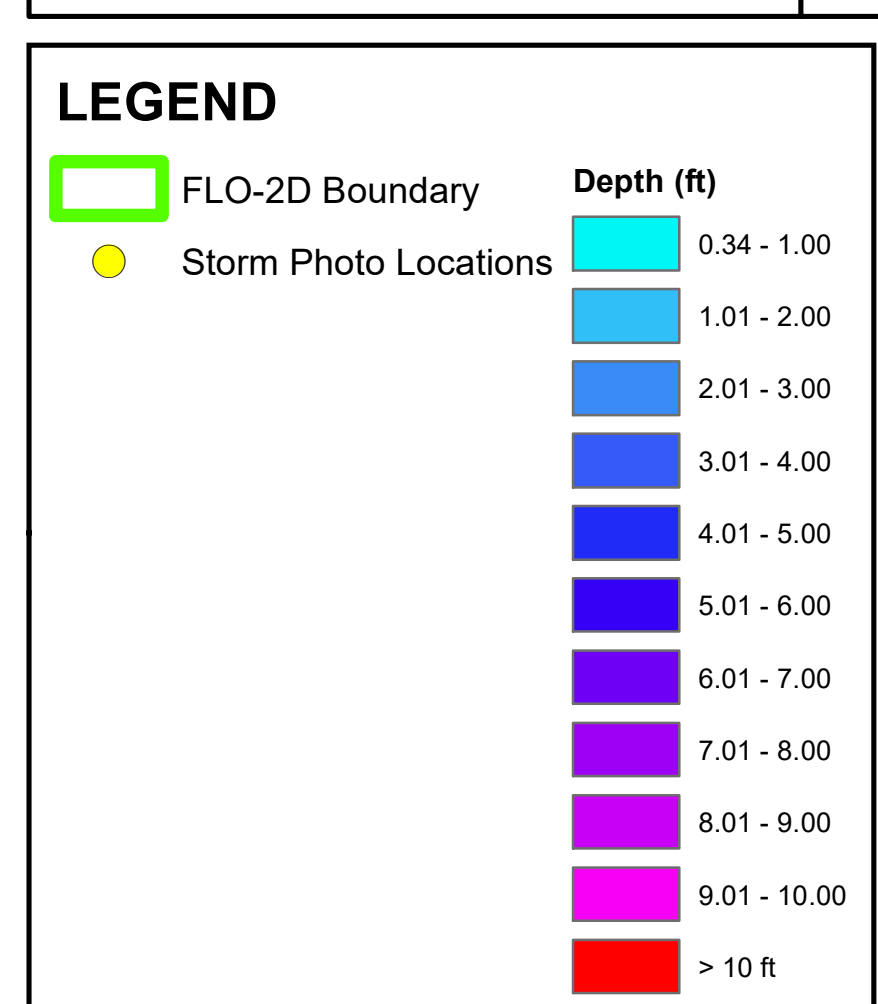

Zone AE - Areas subject to inundation by the 1-percent (100-year) annual-chance flood event determined by detailed methods.

Zone D - Unstudied areas where flood hazards are undetermined But flooding is possible.
