

Collaborating and Comparing for Improved Performance

Brent Stockwell, City of Scottsdale

David Swindell, Arizona State University

Karen Thoreson, Alliance for Innovation

Wynette Reed, City of Goodyear

Key Takeaways

- Comparisons help us understand what we do, track our progress, and provide accurate information about service delivery
- To succeed you need jurisdictional commitment, mutual trust, data sharing and a partnership with a neutral facilitator

Strategic Initiative

Office of Information Technology

Information Technology (IT) services can be largely grouped into categories of resident and/or business-facing and staff-facing services. Resident/business facing systems are systems that residents or businesses interface with directly. Staff facing services include IT infrastructure that must be dependable so employees can effectively leverage IT systems to more efficiently provide service to the community. Keeping these systems operational is essential to providing service to the community.

Benchmark: Application Availability – Online applications like utility bill payment and parks and recreation enrollment are systems that provide direct services to residents and businesses. An application outage is a service disruption and inconvenience to the Town’s customers.

Comparison to Local / National Averages	
City/Town	Performance (%)
Gilbert, AZ	99.32%
Chandler, AZ*	99.00%
Tempe, AZ	N/A
Fort Collins, CO	99.19%
Henderson, NV**	99.29%

*Only reported whole numbers.
**Henderson, NV tracks availability for critical systems, which include application, network and telephone availability. One figure reported for all three.

Benchmark: Network Availability – The town’s data network is essential to the successful use of applications used for service delivery by customer facing business units. A network outage has a direct and immediate impact on customer service and employee productivity.

Comparison to Local / National Averages	
City/Town	Performance (%)
Gilbert, AZ	99.90%
Chandler, AZ*	99.00%
Tempe, AZ	99.93%
Fort Collins, CO**	N/A
Henderson, NV	99.29%

*Only reported whole numbers.
**Fort Collins does not have ability to record network availability per city staff, looking for ways to measure in future.

Benchmark: Telephone Availability – The town’s telephone system is essential to interacting with residents and businesses in need of town services. A telephone outage has a direct and immediate impact on customer service and employee productivity.

Comparison to Local / National Averages	
City/Town	Performance (%)
Gilbert, AZ	99.90%
Chandler, AZ*	99.00%
Tempe, AZ	99.93%
Fort Collins, CO	99.93%
Henderson, NV	99.29%

*Only reported whole numbers.

CREATING A CONSORTIUM

City's spending questioned

For Scottsdale, workers are the largest expense

By **Beth Duckett**
The Arizona Republic

Despite deep cuts planned to city services and personnel next year, Scottsdale's general-fund budget — the money it spends on basic services — is estimated to be millions of dollars greater than other Valley cities' with larger or similar populations.

Many officials defend the higher budget in relation to the number of residents, saying it's the price the city must pay to cater to tourists and residents who demand better services and programs in a city known for its upscale neighborhoods and lifestyle.

But others suggest the city needs to take a harder look at what it's spending in relation to its population.

A good portion of a Scottsdale's general-fund expenses are spent on employee-related costs. An analysis provided by the city shows Scottsdale ranks the highest among the Valley's largest cities when it comes to the number of employees. The city has 11.7 full-time equivalent employees per 1,000 residents, compared with Phoenix's 10.8 and Chandler's 6.9.

Scottsdale Vice Mayor Bob Little-

See **SCOTTSDALE**, Page B8

Lacy Fons of Milwaukee tries on hats while shopping last week in Old Town Scottsdale. Tourism is a big driver of general-fund spending, city officials say, as Scottsdale caters to its visitors as well as its residents. DAVID KADLUBOWSKI/THE REPUBLIC

POPULATION VS. BUDGET SIZE

Scottsdale's projected operating budget is higher than those of other Valley cities of larger or comparable populations. Figures are based on the 2010 census and recent reports from cities. Budget numbers are subject to change as cities refine their plans for the 2011-12 budget year.

	Population	Operating budget
Mesa	439,041	\$228 million (may increase)
Chandler	236,123	\$174 million
Glendale	226,721	\$170.8 million
Scottsdale	217,385	\$235.2 million
Gilbert	208,453	\$103.7 million

EMPLOYEE COSTS OF MAJOR VALLEY CITIES

	Total employees	Employees per 1,000 residents	Personnel costs*
Mesa	3,597.4	8.2	\$219.3 million
Chandler	1,625	6.9	\$151.1 million
Glendale	1,971	8.7	\$149.7 million
Scottsdale	2,546.5	11.7	\$160.4 million
Gilbert	1,181	5.7	\$66 million

How do we compare with neighboring cities? Scottsdale's tax rates are among the lowest of the larger cities.

Police Response Time

Length of time it takes for police to arrive after a resident calls 9-1-1, measured in minutes and seconds.

- Phoenix: Police Department reports the median response time, not the average response time due to known outlier: calls that statistically skew the average
- Glendale: A new CAD system was implemented in November 2013, which created a data discrepancy due to a change in the method for recording "Time Received". For consistency the number here uses "Time Entered"

ASSEMBLING COMPARATIVE DATA AND THE REPORT

Valley Benchmark Cities

FY 2013/14 Report

Typical Monthly Bill for Water and Sewer

- Assumes Single-Family Residential Water Use 9,000 gallons on 3/4" Meter; Sewer Use 8,000 gallons
- Chandler's seasonal rates have been averaged
- Taxes are not included in computations
- Rates are for municipal water providers only

- Assumes Single-Family Residential Water Use 17,000 gallons on 1" Meter; Sewer Use 12,000 gallons
- Chandler's seasonal rates have been averaged
- Taxes are not included in computations
- Rates are for municipal water providers only

Bond Rating

The Standard & Poor's bond rating as of July 2013

- Note: S&P was chosen because all communities hold this rating,
- Ratings are the most recent rating for general obligation debt only

Acknowledgements

Valley Benchmarking is a collaborative consortium that relies heavily upon its member communities for data, and their representatives to the group to evaluate the data to make it useful information for our communities. This report represents a significant effort by all members, and their work is hereby acknowledged.

In addition, special acknowledgement is given to the Marvin Andrews Fellows who compiled the information and created this report.

Police Services

Police services aim to uphold the laws that allow residents of each community to feel safe and secure in their places of residence. Through problem solving, pursuit of those involved with criminal activity, and professional security services, police departments work to ensure the security and lawfulness of their communities. Specific objectives include the following:

- Enforcing the law
- Prevention of crime
- Protecting residents
- Providing emergency response
- Investigating and solving of crime

Photo courtesy of the City of Peoria, AZ

Influencing Factors:

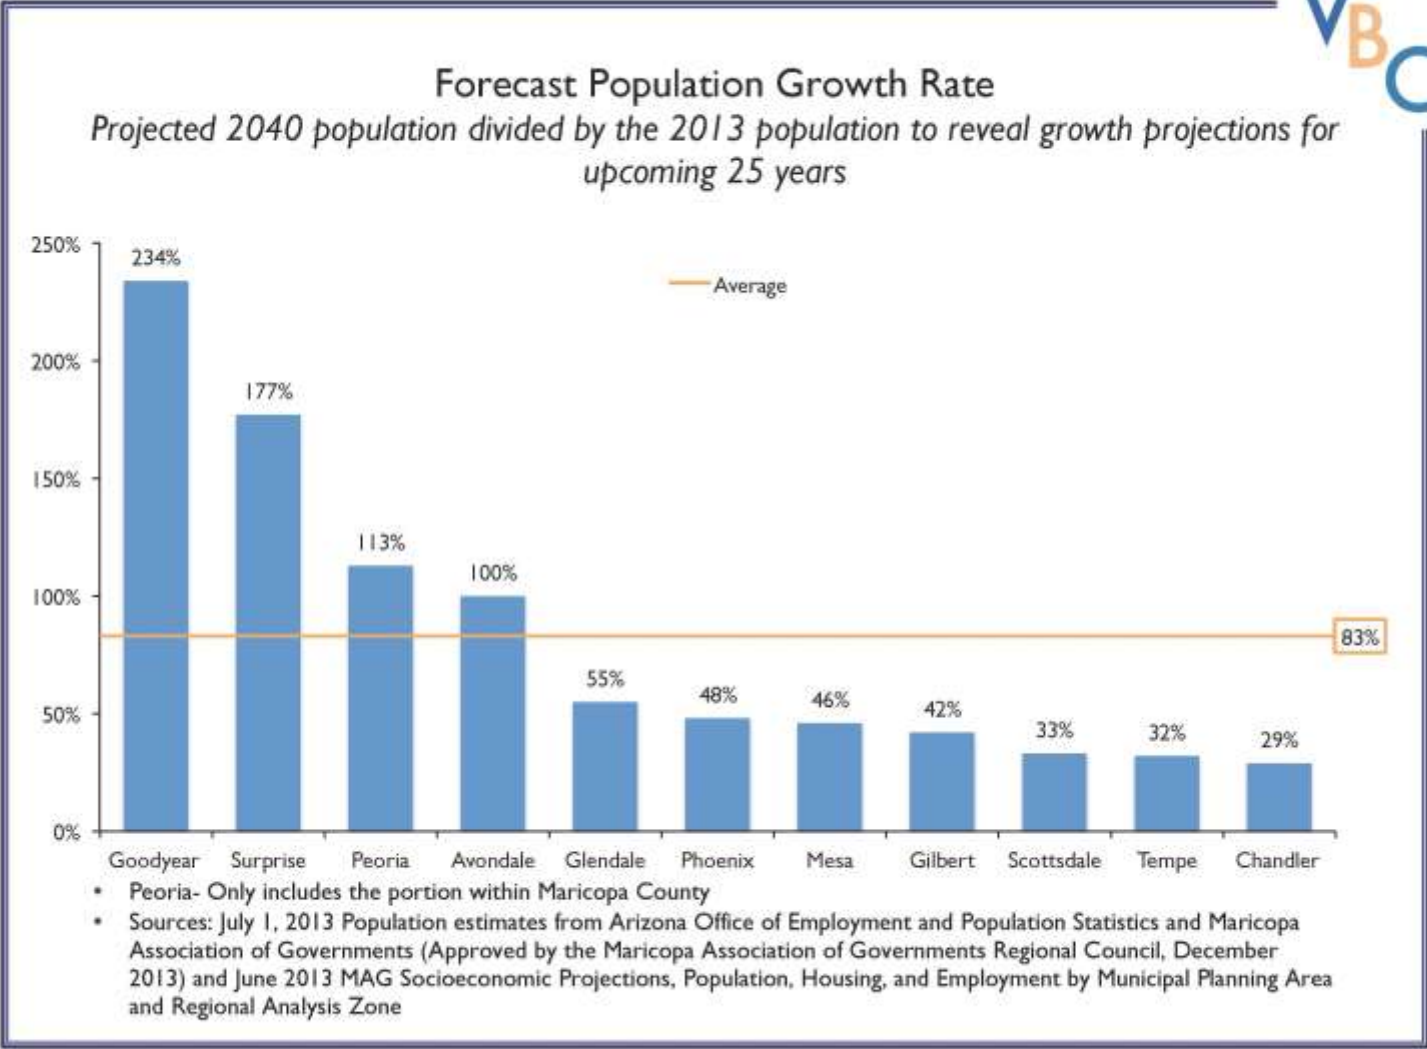

Community Characteristics: The geographic size, diversity of the landscape, and the developed environment of a community can impact the amount and the type of areas that a police department needs to serve.

Impact of Non-Residents: Visitors to a particular city who do not maintain a formal residence impact the need for public safety services. These visitors could be seasonal residents, commuters, from neighboring cities, or tourists.

Citizen Engagement with Police: The extent to which police officers are involved in the community and residents are aware of the services provided by the department. Some police forces are supplemented by civilian staff to provide additional resources and support in the community.

Demographics: This factor considers the socioeconomic status of community residents, along with race, gender, age, and economic health as potential predictors of demand for police services.

Deployment Strategies: How police resources are utilized within a community can vary based on multiple community factors. For example, some agencies place an emphasis on non-sworn roles in patrol support that can offset the cost of more traditional sworn positions.

The purpose of the Valley Benchmark Cities initiative is to have an ongoing benchmarking project to obtain relevant statistics and indicators from peer cities in the Valley to aid in management decision-making and elected official policy making process. Participating communities include the 11 largest cities and towns in the Valley of the Sun. Phoenix, Mesa, Chandler, Glendale, Scottsdale, Gilbert, Tempe, Peoria, Surprise, Avondale and Goodyear. Partners include the Alliance of Innovation, Arizona State University and the ICMA Center for Performance Analytics.

CREATING YOUR OWN CONSORTIUM

You can do it too!

- Identify similar size and scope jurisdictions within your region
- National comparisons are more complex due to differences in climate, geography, demand levels, political environment, funding differences, etc.

Key steps for use by others

- Identify and invite key leaders
- Identify potential university partners
- Build rapport by learning from others
- Dialogue about efforts already underway
- Begin collecting and sharing information
- Consolidate key findings into a report

“Residents who experienced ...
‘operational transparency’ in government services – seeing the work that government is doing – expressed more positive attitudes toward government and greater support for maintaining or expanding the scale of government programs.”
