

Pig & Whistle Pub  
7321 East Main Street  
Scottsdale, Arizona 85251

**Statement Regarding Number of Security Officers**

The Pig & Whistle Pub is committed to providing a safe environment for its patrons and staff, and understands that the industry standard ratio is a security officer to occupant ratio of 1:50.

**Occupancy:** The Scottsdale Fire Marshall allows us a maximum occupancy of 120 persons.

**Security Staffing:** The Pig & Whistle Pub employs two (2) security officers and one (1) security manager, for a total of three (3) security staff. The security officers and managers have attended the requisite Public Safety Plan Security Training and therefore, may be considered when calculating the ratio of security staff to occupants.

**Ratio of Occupancy to Security Officers:** Based on our maximum occupancy and property use, we are required to maintain a security officer to occupant minimum ratio of 1:50. As the result of our employed security staff and maximum occupancy, we will have a security officer to occupant ratio of 1:40 during peak hours. The ratio of 1:40 is better than the minimum required during peak hours.

**Required Ratio:** 1:50

**Actual Ratio:** 1:40 (based on three (3) security staff and a maximum occupancy of 120 persons).
