

Native Plant Tracking Form

Sustainability Indicators Project Data

**Completed forms are to be hand delivered to the Inspector.
For more information, please contact (480) 312-5750.**

Salvage / Cacti Salvage Contractor: _____

Project Name: _____

Project Address: _____

Native Plan Permit Number: _____ Plan Check Number: _____

Instructions

1. Subdivisions and commercial projects will notify the City Inspector 24 hours prior to assessing the survival rate of salvaged plants.
2. No native plants shall be removed from the site prior to notifying the City Inspector.
3. This information will serve as the City's requirement for total number of plants surviving salvage and will be required for all projects prior to issuance of a Certificate of Occupancy.

Complete and submit to the City of Scottsdale Inspector 90 days after the completion of salvage operations for commercial or subdivision projects, and at the time of the #31 Final Site Inspection for single-family residential homes.

	Trees	Cacti	Total
Number of protected plants proposed for salvage			
Number of protected plants actually attempted for salvage			
Number of protected plants successfully surviving salvage			

Date salvage activity began: _____

Date salvage activity completed: _____

Inspector's Name: _____

The contractor must also provide a listing of plant tag numbers that have survived salvage operations to the Inspector.
