Managing Our Water Resources

Scottsdale's effort to reduce water usage, reuse and recycle our water is more important than ever. In the past year, Scottsdale has effectively saved over 38 million gallons of water, a six percent decrease in usage.

Some of Scottsdale's main water reduction efforts were through finding and fixing leaks in parks, removing grass and installing advanced drip irrigation systems and cooling tower monitors. One of the biggest successes came from Scottsdale's water rebate program, which incentivizes citizens for water saving practices. The program received more than 1,200 applications and saw an increase of 434 percent in grass removal rebates.

In addition to these reduction efforts, Scottsdale has continued to benefit from the Advanced Water Treatment Plant, one of the most sophisticated recycled water facilities in the world, to recycle and reuse its water. The innovative facility can treat up to 20 million gallons of wastewater a day to a water quality standard that exceeds that of bottled water and is only the third facility in the nation to be permitted for direct consumption. While the ultra-purified, recycled water is not currently utilized in the drinking water system, it is an important water source for irrigation around the city. Most notably, the recycled water is used to irrigate the TPC Scottsdale, which annually hosts the WM Phoenix Open. This year the golf tournament occurred at the same time as Super Bowl LVII, which brought record numbers of visitors to Scottsdale.

To educate the public on the safety and quality of Scottsdale's ultra-purified, recycled water, Scottsdale Water also collaborated with local breweries in November 2022 for its One Water Brewing Showcase. This event allowed nine different local breweries to use Scottsdale's ultra-purified, recycled water to create beer and provided samples for the public to try. The one-of-a-kind showcase will return to the Scottsdale Waterfront during Canal Convergence in November 2023.

As Scottsdale looks forward, it plans to continue these efforts to ensure a successful and sustainable future.
