I would like to see more activities for younger kids. Seems there is a lot for the teens which is great. Exercise and socialization would be the ideal.

Few and sparse, not exactly fit for all abilities

nice but always full and can't sign up except for waiting list :(

The services are slowly coming back up to expectations. Right after COVID, parents expected the same activities we had before COVID. Things changes families and participants were not very pleased. But, more activities and services that are helpful to participants and families are being implemented. We do need more staff who are more enthusiastic and engaging with participants like we had many years ago. The same excitement and interest from staff does not seem to be consistent. Some staff seem happy to be there and welcoming to family input and some do not. More structure with visuals to support conversations between participants would be helpful during activities too.

This place is the paradise for users with disabilities where they find compassion, support to overcome their disability and the best LOVE.

These are helpful meaningful activities for children and youth with special needs.

Unaware of "adaptive" services.

Get rid of the empty buses, and use a jitney like service to assist citizens get around more efficiently and effectively.

More ways to connect those with disabilities with the larger community.

No idea

You provided inadequate information since you did not include, in the beginning of this, a statement of the number of residents who are in need of these services. Nor did you provide what services are currently offered, what programs are available, nor how we partner with our neighbors -- Tempe, Phoenix, PV, Salt-River Maricopa Community, Cave Creek, Carefree. Which organizations in the community -- non-profit like STARS, or which religiously based groups offer programming.

I don't know what are adaptive services

Making info available about programs

I don't have an explanation as I have no experience with this service

I think many homeless people may need adaptive services.

I am unaware of what is offered.

advertising availability of services

I don't know what is available since I haven't researched, don't have immediate need. I recognize this is important to community.

Help for seniors with no family members. We just had an elderly woman die in our community and no one knew she needed help.

The City of Scottsdale needs to take a better look at our water supply before granting more permits to build anything. It's all about the money for Scottsdale. Not a good thing.

Aquatic options - a pool at every Senior Center.

Communication of available programs

Get the word out, wasn't aware of this service

The city has lost touch with its residents by outsourcing its job to outside survey organizations. I use none of the adaptive programs yet I'm being asked to complete a survey to help improve it. Wouldn't it make more sense to reach out specifically to those residents who actually use the services?

I don't know what's offered.

I have no experience with any of these programs, therefore no thoughts on how to improve them.

High school students are in need of an afterschool program. Nothing is offered at the high school or at a local school that provides accommodations for kids with disabilities. Pre-Covid adaptive services did offer an after school and summer program and have not offered it since 2020.

exercise & socialization for elementary school children

The free after school program at the Adaptive Rec Center and having a summer program at that location needs to continue. It was the only way I was able to work full-time was by having those programs available to my two sons. Inclusion is important, but it is also important to have a more tailored program for after school and summer for participants that need more preferred activities (slower activities) and a more calming sensory environment after school and in the summer. Being at school all day and in inclusive environments at school can be very stressful for our children and we need some alternatives where they can decompress and be themselves, since it is practically impossible to find hab and respite workers for after school, during school breaks, and in the summer.

Events have a capacity limit, many opportunities are on the waiting list. They could create an extension to go camping, this event occurred only once in 2016 with an excursion to the Grand Canyon.

pickelball courts

Activities during the summer months.

Would love the after school program to come back

Reinstate the after school program

expand marketing of your programs- reach out to schools for partnership

Awareness and outreach. I have lived in Scottsdale for nearly 20 years and this is the first I'm hearing of adaptive services. While I don't utilize them, I would like to support them.

The after school program was great, I really wish that it were reinstated. As a single mom of a teen with a disability, it was the only program in the area that was a "safe haven" (as far as programs go), that my daughter absolutely loved and looked forward to daily. No other programs in the area cater to adolescents with disabilities, so trying to enroll her in a YMCA or Boys and Girls club after school program never worked and made her feel like the odd one out.

Education to households on the importance of spay/neuter their pet.

Not sure of offerings

Need more events for young special needs children

Opportunities for making friends and more one on one opportunities to pair a volunteer with someone in need. I tried to volunteer to adopt a senior but there were none available, I find that hard to believe. I would also like to write letters to seniors in assisted living who would like a pen pal. Couldn't find a program and don't know how to get a program started. I would gladly start one with help.

Need older adult Parkinson's dementia programming

Need activities for pre-teens ages 11-12!!!

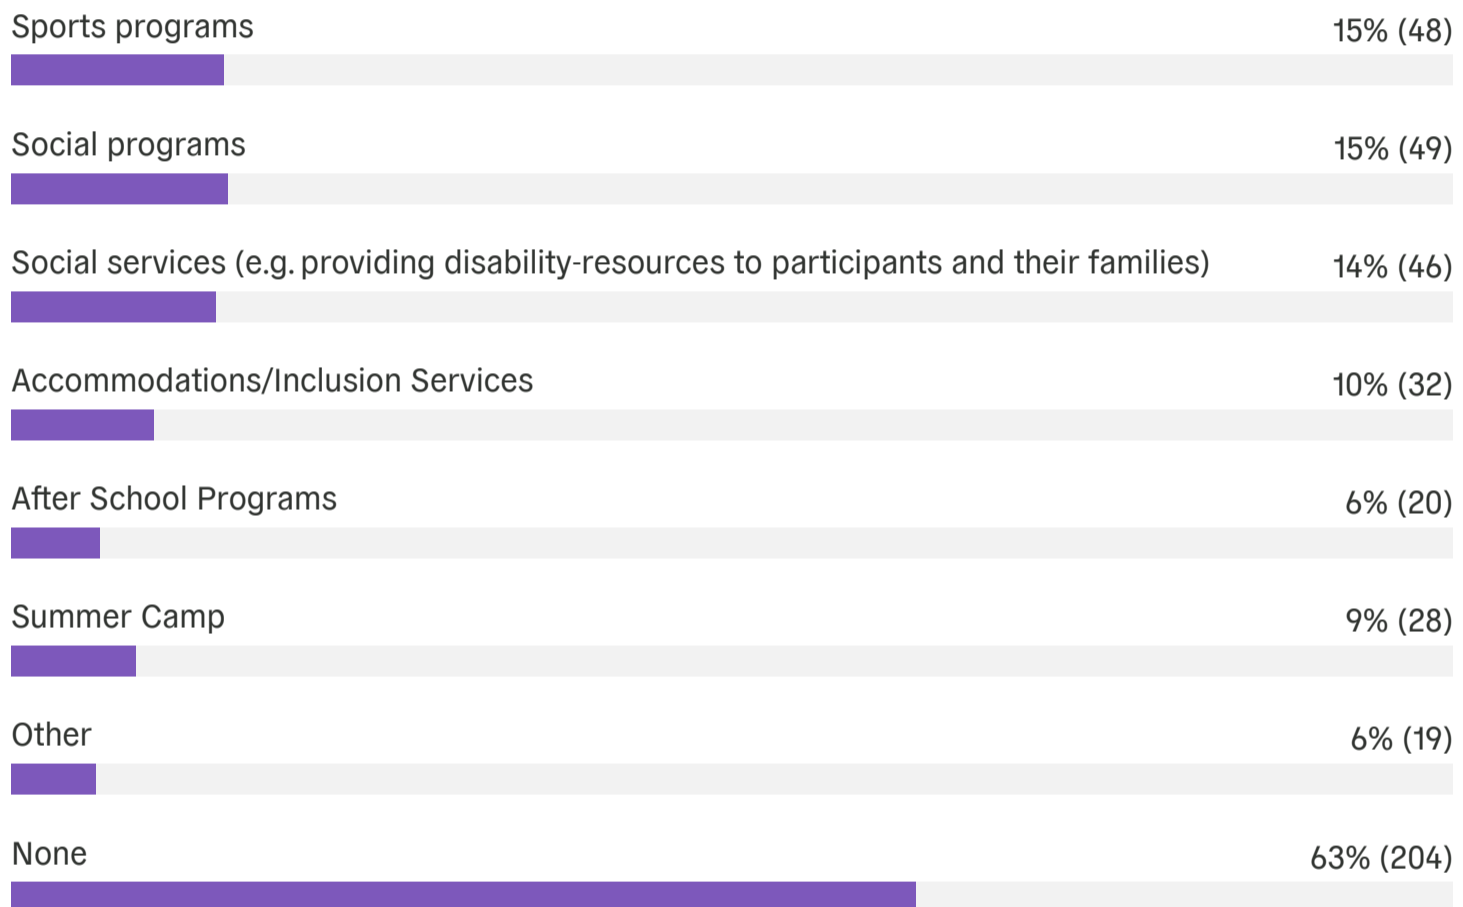

After school program needs to come back

We are new to adaptive services for my 3 year old daughter, but what I have learned so far in a conversation with Stacy Yoder, there is so much available to my daughter to help her have similar experiences to typical children her age. I am so impressed that Scottsdale has dedicated dollars to this effort, and even a survey to improve it. Thank you!

2 criticisms: 1) the exclusion of any Special Olympian if they were with some other team after July 31 of 2022 (I assume this will continue annually) as no other team does this in SOAZ (it was checked and verified), which becomes discriminating, and 2) the lack of impaired-adult social activities, all noted activities are geared to the young and/or lower functioning, demonstrating exclusion. The baby boomers of today, like myself, are the ones who have impaired-adult like-minded who sorely need social activities, and more as they age. And, surprisingly if not thought about or planned, these youth, teens and other younger adults will grow older very fast as well. If you are to help, aid, support

all impaired persons, then it should be done also for the older, and not put it aside because that is easier. Since you are CAPRA-rated, I am surprised that I've had to make these comments on inclusion, etc. Now, Scottsdale Parks and Recreation appears to do well, but they must get more involved with the Adapted Recreation part as they are the overseer. It is not doing as well as it has in the past and many parents and their children, especially adult children have left. Sad. We have all had to go somewhere to find appropriate social activities for the adults, and some to find fairness in your sports activities.

Are any of your following needs, programs, or services being fulfilled elsewhere, outside the City of Scottsdale Adaptive Services? Check all that apply.

Please Explain.

My explanations on question #6 is fully relatable and can be used here in its entirety as well. We live in the Cave Creek area since 2018 and joined Scottsdale Adapted Rec, it being the closest for my adult son to attend for sports and activities, and it was recommended by a friend, who has left also for the situation there. I am a corporate business-owner, a mother, and a DDD licensed homecare giver, I obviously wear many hats as most people do. I have seen the center's programs get more limited for the adults after the Covid epidemic, some even before. Now that we will be/were possibly moving to Scottsdale by the 1st quarter of 2024, I am questioning whether to move somewhere else since I am very concerned of the rest of my son's life there after I pass worrying that Adapted Rec will deteriorate further due to exclusion. Many parents are talking about "what happens to the adult like-minded?" This very serious.

Which type(s) of programming are you interested in seeing expanded at the Adaptive Services Center? Check all that apply.

My loved one has benefitted from many of the City of Scottsdale's Adapted services in the past, but no longer does more than Special Olympics swimming. I fully support all the programming you provide, from early childhood through adult services.

Transportation to/fro grocery store and doctor appts

Completeley unfamiliar with these programs.

During school breaks, need socializing

Preferred activity discussion/activity groups to support social speech, like Pokemon Club, Robotics Club, Trains Club, Disney Club, Draw With Me Club, Lego Club, Hair Styling Club. There are some common interests among our families. Let's find out the top 3 or 4 and make some activity groups, so they can get together and talk to their hearts content about these common topics. Kareoke has been so much fun for my sons!

To fairly treat adults (of all adult ages, 21+ and up, even to the senior ages) to equal access to Special Olympics there at any time/any sport and to have appropriate social activities for specifically them so they may interact/interface with their like-minded peers, age-appropriately. Please do not forget all of these younger classes you list above will soon get older as well. Proper over-sight, training, and leadership would help with proper knowledge and skills. Then I would see this department fully CAPRA-compliant.
