Construction Alert:

SOUTHWEST GAS

Osborn and Indian School Roads

August-December 2016---Hotline 602-750-7139

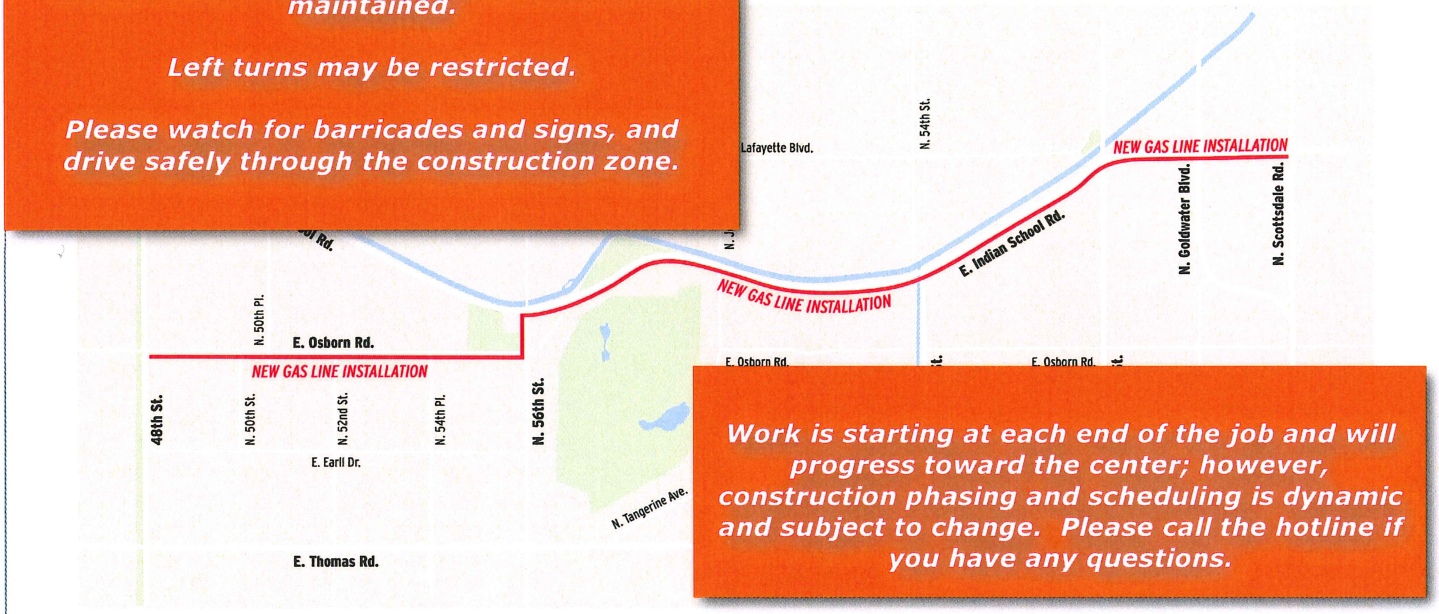
Southwest Gas has contracted with Fugal Companies, Inc. to replace existing natural gas infrastructure within Osborn and Indian School Roads as shown on the map below. Work will take place Monday through Friday 6 am (7 am in residential areas) – 7 pm. Some Saturday work or night work may be scheduled to accommodate the construction schedule.

Most of the infrastructure will be installed by boring underneath pavement, however some trenching and cuts in the pavement are likely. Upon completion of the work, the streets will be sealed with a pavement sealant material, returning them to their existing condition.

At least one lane of traffic in each direction and access to all residents and businesses will be maintained.

Left turns may be restricted.

Please watch for barricades and signs, and drive safely through the construction zone.



Work is starting at each end of the job and will progress toward the center; however, construction phasing and scheduling is dynamic and subject to change. Please call the hotline if you have any questions.

Southwest Gas is committed to providing its customers with safe and reliable natural gas. Periodic infrastructure replacement is a key part of this commitment. For more information, call the construction hotline at **602-750-7139.**

Thank you for your patience during construction.
