Traffic Analysis/Recommendation

This first phase of park improvements will not generate any significant vehicular or pedestrian traffic due to the limited public facilities being provided.

Additional traffic analysis and improvements will be provided with the future park development.

Pedestrian facilities will be provided at the 91st Street and Trailside View intersection as part of the future park expansion when it is anticipated that the park usage will increase.

City Council Approval of Proposed Phase 1 Municipal Use Master Site Plan, Case 14-UP-2020
This section of Alley contains a portion of the Soleri Park.

This section of Alley contains numerous large utility boxes that would be difficult to move.

This section of Alley contains the drive aisle to the parking area.

- Alley is used regularly by service and utility vehicles.
- For several properties there are parking areas accessed by the alley.
- The area between the alley and the path on the canal is a steep slope.

- This section of alley borders the existing Rosa Garden parking lot. In order to utilize the dedicated alley for an open space, the parking lot would be reconfigured and some existing parking spaces would be lost.
This is the portion of alley that could most easily be repurposed for a park. It is below the grade of the canal bank, so it would have to be raised to serve as an extension to the canal pedestrian space.

This is a street and contains a major utility vault. It also serves as the access to the parking and service entries for the...
