**St. Patrick's Day Safety Plan**  
**Wednesday March 17<sup>th</sup>**  
**\*Revised**

**February 17th, 2021 DF**

The goal of the day is to offer a safe Irish celebration with proper social distancing guidelines and maximum sanitization for the safety of all that attend.

All staff will have a health screening day of event. We will take temperature and safety health questionnaire. If they feel sick or have symptoms, they will be sent home. Each employee and security staff will check in with the manager detailed to the health screening and clock in after they pass. Manager will go over the safety guidelines and serving protocol for the event so all are on the same page. A team meeting will be preformed a week prior to go over all safety protocol so all are aware of the severity of the rules. Keep our patrons safe and happy.

The extension of premise site plan is attached with a layout of the parking lot area and how we plan to space out patrons, staff, and entertainment. A 6 ft tall fence will surround the area and keep everyone safe inside with an

entrance gate to the west facing fence wall and exit gate to the east facing fence wall.

We will be having small musical groups throughout the day. Giving them at least 15 ft of space between them and the crowd. They will preform underneath a 10 x 10 tent in the southeast corner of the beer garden.

\*We will have around 20-25 tables that have a maximum of 10 chairs around each one. Tables capacity sizes will range from a 2-4 top for a small table to the large table size of 8-10 top. Tables will all be preset, and no groups will be allowed to move or join tables for safety reasons. No groups will be added to other tables. Once the Hostess seats a group at a table, they may remove their masks to enjoy food or drink. The tables will be spaced 6 ft diameter away from each other. So that is 6 ft diameter from the back of the chair of one table to back of chair of the closest table. Once the tables are set with chairs, we will put a capacity limit on the beer garden. We will still have the 50 percent capacity limit inside both the Clancy's Bar and Jack room. Hostess will keep updated availability at gate for proper seating.\*

Tables will be served food and drinks by servers only. No going up to the bar for patrons. They will have to go through the servers only. This will eliminate crowds gathering around bars.

At the entrance of the beer garden will have security checking IDs and putting on wristbands. Making sure the

security staff sanitizes in between each patron. We will have 6ft spacing signs on ground to space anyone waiting in line. Single file line up to the gate. Large 2ft by 3ft safety signs and rules of the beer garden will be posted on 'A' frames and mounted to the fence leading up to the gate so all patrons are aware of the rules. Masks signs will display masks on unless seated at a table. Security will go over the basic rules of masks and serving protocol. After ID check, a hostess will escort the group to a clean table inside or outside. Hand them one time use paper throw away menus. The server for the table will take over from there.

Sanitation team will clean table after each group use to clean and sanitize for next use. A clean table will be marked with table tent saying safe to use after. Tables will be covered with plastic tablecloth so easy to clean and wipe off. If needed to be replaced they will do so. They will also hit all handles throughout the restaurant and fill sanitizer where needed. The ATM machines will also be sanitized twice hourly.

Hand Sanitizing stations will be spaced properly through the beer garden and especially at the entrance gate and outside the bathrooms.

Bathrooms will be cleaned at least once an hour by bathroom attendant. Safety Disinfectant spray will be applied to hand touching areas and make sure plenty of toiletries and sanitizer are full.

We will have a Clancy's memorabilia booth selling Clancy's gear such as t shirts and sweaters. Gear will be displayed and ordered in safe manor with sanitizing after each transaction.

The St. Patrick's Day celebration is one of our favorite holidays and patrons have enjoyed for years. We know with the COVID-19 we must be as safe as possible. We are open for any other ideas that we can add to the plan. Safety first is the main priority.
