

Scottsdale Drinking Water Lead Screening in Schools Program

As part of the Arizona Department of Environmental Quality's proactive statewide public school drinking water lead screening program, Scottsdale Water tested representative drinking water sources (i.e. water fountains and cafeteria sinks) at all public schools in the Scottsdale Water service area. The testing has also been offered at no charge to all private and charter schools and daycares.

As of, Oct. 1, 2017, the following schools in the Scottsdale Water service area have completed proactive lead screening and have taken appropriate actions if any problems were identified.

School District	School
Paradise Valley Unified School District	Copper Canyon Elementary
Paradise Valley Unified School District	Grayhawk Elementary
