

Free Activity Booklets

Project WET provides these engaging booklets that will take your students on an epic journey through water conservation in Arizona!

| | | | |
|--|---|--|--|
| | <p>Every Drop Counts Students will explore the hydrologic cycle, worldwide water quantity, basic water quality issues, and how water connects people worldwide. All activities reinforce that when it comes to water, every drop counts! Ages 8-12</p> | | <p>Discovering Drought What exactly is a drought? Learn about the role of snow pack and groundwater; droughts around the world and throughout history; predicting and planning for drought; plant and animal adaptations; and dendrochronology. Ages 8-12</p> |
| | <p>Watershed Protection What's a watershed? How can you protect a watershed using simple, everyday actions? What watershed habitats support different plants and animals? Learn the answers to these questions and more! Ages 8-12</p> | | <p>Discover the Colorado River In this intro to the Colorado watershed students play geography games, do experiments, and create hydrographs. Topics include Colorado basin cultures, history, art, hydrology, water management, and conservation Ages 8-12</p> |
| | <p>Discover Ground Water and Springs Through interactive lessons (such as filling glasses with sand, gravel, and clay) students learn the principles related to water flow. Watershed animals, hot and cold springs, and everyday water uses are also covered. Ages 8-12</p> | | <p>Celebrate Wetlands Using everyday items (such as coffee, filters, celery, and food coloring) students learn about wetlands. An 11" x 16" poster reminds students of the many spectacular plant and animal species of the wetlands. Ages 8-12</p> |
| | <p>Explore Sagebrush Prairie Explore the Sagebrush Prairie, a western ecosystem where minimal rainfall yields a great diversity of life! Through mazes, math, and mapping, students learn about a multitude of animals and plants. Ages 8-12</p> | | <p>Healthy Water, Healthy People Through informative text, activities, investigations, and experiments, this booklet is designed to illustrate water quality topics and make them intriguing, relevant, and fun for students. Ages 8-12</p> |
